## 1. GENERAL INTRODUCTION

This document describes TA Homepage MyHomepage 1.3.1.22 installation.

Two kinds of installation are available:

- Quick installation with script
- Manual installation

Final application version will be TA Homepage MyHomepage 1.3.1.22 with base component 5.2.0.32 compliant.

After the installation change the alarm list in config file for specify the report.

## 2. INSTALLATION CONDITIONS

This must be installed on base component 5.2.0.32 Information about this installation:

Final module version	1.3.1.22
Final base component version	5.2.0.32
Quick installation script	install_homepage_myhomepage_1.3.1.22.sh

### 3. QUICK T&A MYHOMEPAGE INSTALLATION

#### 3.1. SUMMARY

N°	Step	Necessary files/directories	Description
1	Root connection on T&A server	NA	NA
2	Quick installation script and archive copy on T&A server	install_homepage_myhomepage_1.3.1.22.sh homepage_myhomepage_1.3.1.22.tar.gz	Copy files in below directory : /home/ta_install
3	Change rigths on quick installation script	In /home/ta_install directory	Launch following commands: chmod 777 install_homepage_myhomepage_1.3.1.22.sh and dos2unix install_homepage_myhomepage_1.3.1.22.sh
4	Quick installation script execution	install_homepage_myhomepage_1.3.1.22.sh	sh install_homepage_myhomepage_1.3.1.22.sh Follow script instructions.

#### 3.2. STEP 1: CREATION OF INSTALLATION DIRECTORY ON T&A SERVER

Verify if "ta\_install" directory dedicated to installation components exists:

```
su - root
```

```
cd /home
```

```
ls -lrt
```

If not existing, create "ta\_install" directory:

```
mkdir ta_install
```

#### 3.3. STEP 2: COPY OF NEEDED FILES AND DIRECTORIES

From Windows (with Winscp or other tool), with root connection, copy following file:

```
>/media/cdrecorder /install/homepage_myhomepage_v1.3.1.22.tar.gz  
>/media/cdrecorder/install/install_homepage_1.3.1.22.sh
```

#### 3.4. STEPS [3-4]: QUICK INSTALLATION SCRIPT EXECUTION

Connected as "root" on T&A server, execute following commands:

➤ Go in T&A server installation directory:

```
cd /home/ta_install
```

➤ For solving Linux / Windows compatibility issues, launch “dos2unix” tool (only for .sh extensions):

**dos2unix install\_homepage\_myhomepage\_1.3.1.22.sh**

➤ Change quick installation script rights:

**chmod +x install\_homepage\_myhomepage\_1.3.1.22.sh**

➤ Launch quick installation script execution:

**sh install\_homepage\_myhomepage\_1.3.1.22.sh**

➤ Make sure that the version is the 1.3.1.22 and confirm.

➤ Enter your application name and confirm.
